PHYSICS

Research in Nonlinear Vibration 4/2025 – Present

"Asymmetric Monostable Behavior of an elastic von Mises Truss Under Base Excitation"

- Studied nonlinear vibration and authored paper with the help of Professor P. Kim, Jeonbuk University, Korea
- Modeled an elastic von Mises truss in MATLAB and showed that a constant biasing force converts a bistable system into an asymmetric monostable one
- Poster accepted for presentation at Global Conference on Industrial, Materials, and Manufacturing (GCIMM), 2026
- Under review of National High School Journal of Science (NHSJS), 2026

University of Chicago 3 Week Summer Session 7/2026

Gravitation to Levitation: Physics from Supernova to Superconductor (PHYS 10700)
Grade: A

- Studied advanced topics in physics for 3 weeks in a discussion-based university like lectures
- Created presentations about Hubble tension and blackbody radiation with group members

Individual Research in Cantilever Vibration 11th – Present

"Investigation on the Effect of Temperature Parameter on a Vibrating Cantilever System"

- Conducted research and experiment on the effect of temperature on the natural frequency of a cantilever beam

College Courses (Online) 8/2026 – Present

Finished:
Understanding Einstein: The Special Theory of Relativity – Stanford University (Coursera)
In Progress:
Quantum Mechanics for Scientists and Engineers 1 – Stanford Online (edX)

STEM

Member
Chadwick International Mathematics Competition 10th – Present

- Contributed hosting semi-annual mathematics competitions for the school's middle and high schoolers by creating original problems and supervising exams.
